COPPER BULLION AT PAYMASTER

Test Run Made in Brick Furnace at the Mine.

SILVER KING MACHINERY

NEW HOIST TO BE MOVED TO MINE AT ONCE.

The little fire-brick smelting furpany's property, near the Dixie, in Washington county, was "blown in" the other day and, during the thirtyfive hours that the brick stood the heat, nine tons of ore were put through and more than one and onehalf tons of high grade copper bul-lion was made. The test made was so successful that the management of the company is now considering the question of erecting permanent works question of erecting permanent works in order that the output of the mine may be handled in much the same manner as is that of the Utah & East-ern company's Dixie bonanza. The trial run was made in the presence of Superintendent S. L. Adams, jr., President W. H. Brereton, Secretary Walter Adams, and H. P. Randall, and a number of ladies who accompanied the officials from Provo to the mine. At the property a great deal of fine ore has already been opened up and it has now been determined to push shead and block out the ores with as much speed as possible so that the property will be in readiness for the day when an adult smetter is ready

It is understood that the citizens of St. George are considering a proposition to have the proposed new smelt-The Paymaster is believed to have in it the making of one of the big copper producers of the state.

INSPECTED CARRIE MACK MINE.

Rich Ore Brought in From Property West of Lake.

retary Gideon Snyder of the Car rie Mack company, accompanied by S. M. Levy, manager of the Annie Laurie, has been on a four days' trip to the company's property at Silver Island, west of the lake, and they return much enthused. The shaft on the property has reached a depth of 100 feet, and a decision has been reached to do 100 feet or more of drift-

ing before going deeper.

Several sample sacks of ore were brought by the visitors to the mine and, while no assays have yet been had upon them, the merest novice would have no difficulty in reaching the conclusion that all of the ore is rich in silver, lead, copper and gold. The ore taken out in sinking has been sacked up to within a few days ago, and the sacked ore has been used to form a bulkhead against which to pile up the rock as it is now coming

to the surface.

"Considering the fact that all work so far done has been with the aid only of a windlass," said Secretary Snyder, "we consider that the men have done well during the less than five months they have been isolated at camp. The ledge has shown good ore from the very start, and we feel that it is now in order to do some drifting it is now in order to do some drifting before placing a hoist and going deep-er. The country is an absolutely new one and, while everything looks right for the making of a mine of more than ordinary merit, it is the opinion of those of us who have discussed the matter that we should feel our way and be certain that a broader cam-paign is fully justified. Within the next ten days a meeting will be held and plans for the future will be mapped out."

Mr. Levy, who is also interested in

the proposition, expressed himself as being satisfied, as he was when he first examined the prospect, that it was full of merit. He will back up

the ground has been thoroughly ex-ploited. It is said by men with long ex-perience in the mining world that the Extension will prove Florida mountain has more than one big mine and only awaits development to make it a second

Trade Dollar.

Mr. Orum says the Addie is looking good. The men are now working in the uprise and have a small streak of very rich ore that runs from \$70 to \$200 to the ton. There is also a fine looking body of ore that Mr. Orum has not as yet had assayed, and before the Avalanche reaches its readers its values will be known. He says it looks good to him. The Addie has had its ups and downs, principally downs. It is hoped that under the present management the that under the present management th mine will repay all that it has cost be sides a handsome profit. The mill wil be started and kept running on half time until sufficient ore is taken out to keep it going day and night.

DALY-WEST DIVIDEND.

Second Quarterly Distribution of

\$108,000 Comes June 15. The second quarterly dividend of the Daly-West Mining company, in the sum of 60c a share, or \$108,000, was posted yesterday, and distribution will be made on June 15 to shareholders of record June 10. News other than that which is occasionally issued to the eastern directors is becoming the eastern directors is becoming scarce article, as the managemen however, that everything is moving with clockwork regularity and that the dividends being paid are more than

MINING STOCK EXCHANGE.

Market is Dull and Lifeless and Prices But Little Changed.

The stock market bulletin announcing that the czar of Russia had been assussinated, strange as it may seem, had little effect on the local exchange, unless the reckless unloading of 2,000 shares of Martha Washington at ½c per share might have been precipitated by it. The market was dull and lifeless. No one market, was dull and lifeless. No one market was dull and lifeless. No one market was dull and lifeless, no one of their Boston correspondents, the following copper market comment and record of sales of, Utah stocks on the ported at Trinity Lake.

Discovery of Metal in Quantity Reported at Trinity Lake.

Discovery of Metal in Quantity Reported at Trinity Lake.

Information received in Boise through B. J. Erwin and W. J. Turner is to the effect that a great strike of molybdenum has been made in the vicinity of Trinity Lake.

The week was dull and lifeless. No one more tissues on the report just published. The weekless in his stock, runners of the czar's deuth and more Equitable troubles, caused a decline of from 1 to 2 points all the property and a some description of th

through the list. Boston was a trifle weak, but considering the decline in Amalgamated Copper, stocks held remarkably well. Utah Stocks in Boston.

Sensationally Rich.

(Special to The Herald.) Goldfield, Nev., June 6.-Developme on the Sandstorm for the past few days have been sensational. At the fifty-foot level a grab sample showed a value of \$204 per ton. Pannings from drill holes a few feet farther down indicated \$400 a ton and better. In the old vertical shaft thirty feet beneath the surface, a streak about twelve inches wide has been opened running into the thou-sands. Pannings have been made indi-cating values as high as \$30,000 a ton. Pieces taken out are 25 per cent pure gold. It is possible that the streak will sack, just as it comes out, from \$1,000 to \$5,000 to the ton.

the camp has added another great mine

to its list. The big strike referred to above was made on the Loftus-Davis lease on the Sandstorm property.

A year ago Michigan capitalists took a bond on the entire Sandstorm property for \$80,000. They had a gang of men at work for three months and sunk men at work for three months and sunk the shaft where the hig strike was just made. They made an average of fifty assays daily, but they did not get a showing better than \$4 and gave up in disgust. When Loftus and Davis took the lease known as No. 5, they sacked and shipped all of the ore on the dump from the shaft and got returns of \$140 per ton without sorting.

The strike is causing great excitement here. Armed guards are on watch at the Sandstorm and the ore is being sacked as fast as mined. A party of eastern capitalists, includ-ing representatives of John Hays Ham-mond and the Guggenheim interests, arrived here a few days ago. It is understood these people are largely inter-ested in valuable placer properties in Tule canyon, about thirty-five miles southwest of Goldfield, and will go di-

rect to that district.

ne property which is under bond for \$125,000 to Mr. Hammond and his associates, will pass into the hands of his representatives today. A complete dredging plant has been ordered and will be placed in operation as soon as

will be placed in operation as soon as Montana Tonopah have just purchased for themselves and Philadelphia capitalists for \$250,000 three claims and a fraction which adjoin the Montgomery-Shoshone Mines company of Bullfrog, on the north. PRICES TEND DOWNWARD

NO NEWS TO ACCOUNT FOR THE

to Mine at Once.

Manager Solon Spiro of the Silver King Consolidated has been notified that the powerful hoisting plant recently purchased from the Ontario company is now ready to move, that the foundations are about ready for its installation, and that the roads to the mine will permit of hauling. That being the case, he will leave for camp this morning and make final arrangements for the transfer of the sands. Pannings have been made indicating values as high as \$30,000 a ton. Pieces taken out are 25 per cent pure gold. It is possible that the streak will sack, just as it comes out, from \$1,000 to \$5,000 to the ton.

It is impossible yet to say anything of the extent of this phenomenal ore; but certain it is that in the Sandstorm the camp has added another great mine to its list. The big strike referred to above was made on the Loftus-Davis prices is correspondingly greater. With the market strictly in professional hands the movement of one day is désigned to secure a point of vantage for

day. The present market reports little else than this maneuvering among pro-fessional traders to move prices and to afford opportunity for their efforts to secure an advantage at other's expense. Sush news as t was today was not unfavorable to values, and there were some items of advantage. The weekly crop report of the weather bureau was regarded as

distinctly encouraging.

A dominant influence in the market was the decided weakness of Amalgamated Copper. Many intimations were affoat in speculative circles be fore the market opened that a sharp upward movement in this stock was intended, based on the financial statement of the company published yester-day. Suspicions were entertained that a process of unloading was going on on the part of a recently active pool in the stock. The effect was disquiet-

ing on pool operators in other stocks, and the weakening effect spread by sympathy. The Equitable Life incident took on some revived influence for de-pression owing to the successive retire-ments announced from the directorate of the society by persons of influence n the financial world. Security man kets were affected by the rumor of the assassination of the czar. Whatever effect was produced here was purely sentimental as the operations in this sufficient to pay for the expenses of cabling. There was some disposition to look to the money market as the parent ease of money. The surpl serve disclosed by Saturday's

statement was at a low level, and large special transactions continue to make requirements on the market.

The market closed weak at the lowest of the day.

Bonds were dull and irregular. Total sales (par value), \$,685,000.

United States bonds were all un-

changed on call.

Fork canyon have all been renewed or repaired preparatory to the lively season of ore hauling which is counted upon for the present season, and which has been inaugurated by one or stwo of the companies operating in the district already. The bridges have been constructed with a view to their being able to sustain a weight of 6,009 pounds without damage.

You do not have to fish for an opportunity to save money on your Clothing-that is, if you have an eagle's eye for value and will take the trouble to look over \$10.00, \$12.50, \$15.00 Suits.

A Salt Lake City citizen tells here a certain cure.

James M. Morris, miner, of 41 South Sixth West, says: "I followed railroading for months, and if the constant jarring of the train, the stooping, twisting and turning involved in such an occupation was not the primary cause of kidney trouble it certainly aggravated it when the attacks occurred. Later I had considerable annoyance from the duil disagreeable aching in my back, often so persistent and nagging that I was unable to complete a day's work. I have been so uncomfortable in any position that to rest was out of the question, and very often my rest was disturbed. I knew from the action and condition of the kidney secretions that those organs required attention, but when a man exhausts all his knowledge of medicine and standard remedies guaranteed to check such disturbances, and all his efforts are futile, he naturally becomes discouraged or is connd all his efforts are futile, he natand all his efforts are future, he hat-urally becomes discouraged or is con-stantly on the outlook for some means to help. In this way I read advertise-ments about Dean's Kidney Pills, and went to the F. J. Hill Drug Co.'s store for a box. If a dose or two had not helped me I never would have contin-led the treatment and if the treatment led the treatment, and if the treatment and not been very satisfactory I could not be induced under any consideration o publicly endorse the remedy."

A Grim Tragedy.

Is daily enacted, in thousands of homes, as death claims, in each one, another victim of Consumption or Pneumonia. But when Coughs and Colds are properly treated, the tragedy is averted. F. G. Huntley, of Oakiandon, Ind., writes: "My wife had the consumption, and three doctors gave her up. Finally she took Dr. King's New Discovery for Consumption, Coughs and Colds, which cured her, and today she is, well and strong." It kills the germs of all diseases. One dose relieves. Guaranteed at 50c and \$1.00 by Z. C. M. I. Drug Dept. Trial bottle free.
